Pyroplex® Pipe Collars have been specifically designed to re-instate the fire resistance of a wall or floor which has been penetrated by plastic flammable pipes used in soil, waste and drainage services. They will seal closed flammable pipes from 25mm to 400mm diameter and can be face fixed or set-in to a wall or ceiling structure. They are suitable for use on concrete, masonry and plasterboard partitions. They feature a tab closing device which ensures the Pipe Collars are quick and easy to fix in place.

Field of application

Pyroplex® Pipe Collars have been specifically designed to prevent the passage of fire and hot gases through:

- Concrete, masonry and plasterboard partitions
- Concrete floor constructions
- Soil, waste and drainage 'above ground' applications

Product features

- Pyroplex® Pipe Collars have achieved a fire rating of either 2 hour or 4 hour.
- 2 hour collar has a galvanised steel outer casing.
- 4 hour collar has a stainless steel outer casing.
- Tab closing device means collars are easy to fix in place around pipe and rotate or slide into position.
- Intumescent material is totally unaffected by water, is robust, 'non-flaking' and difficult to tear.

Intumescent Pipe Collars 4-hour fire rated

PRODUCT CODE
