

Easi-T Locks Care & Maintenance

Products have been subjected to internal performance testing and have been approved by Warrington APT Laboratories Ltd to BS EN1634-1: 2000 for ½ hr and 1 hr fire rating.

Easi-T Lock Series – 10-year Mechanical Guarantee

Easi-T Locks will be subject to a 10-year mechanical guarantee on condition that:

- The lock range is covered by 10-year mechanical guarantee on condition that all products are fitted in accordance with the manufacturers recommendations and are not subjected to abuse, vandalism or miss-use prior to or following installation.
- The Lock case is not opened for the reversal of the latch mechanism (refer to Easi-T Latch Reversal System)
- In the event that a product or products are considered to be part of a claim under the guarantee, the manufacturer must be given the opportunity to inspect the product or products, in their originally installed position, prior to its' or their removal from site.
- All orders must clearly indicate the name and address of the project for which the product is intended and the proposed installation date from which the guarantee will run.

Maintenance Program

- Easi-T locks are designed to be self-maintaining under frequent use. If locks are left unused for a long period of time a single light use of WD40 would be advised if there was any stiffness on initial usage.

Easy-T Latch Reversal System

1 - Insert Easi - T Tool

2 - Reverse Latch

3 - Remove Easi - T Tool
